

# REACT.JS

## FLux, Redux

**=== FROM THE FUTURE ===**

**Wait what?**

# OBJECTIVE:

- Introduce React.js/Flux/Redux to team
- Create new scaffolding (SPA, micro-app architecture)
- Explore new UI concepts
- Jump into the future (hot reloading time-travel)

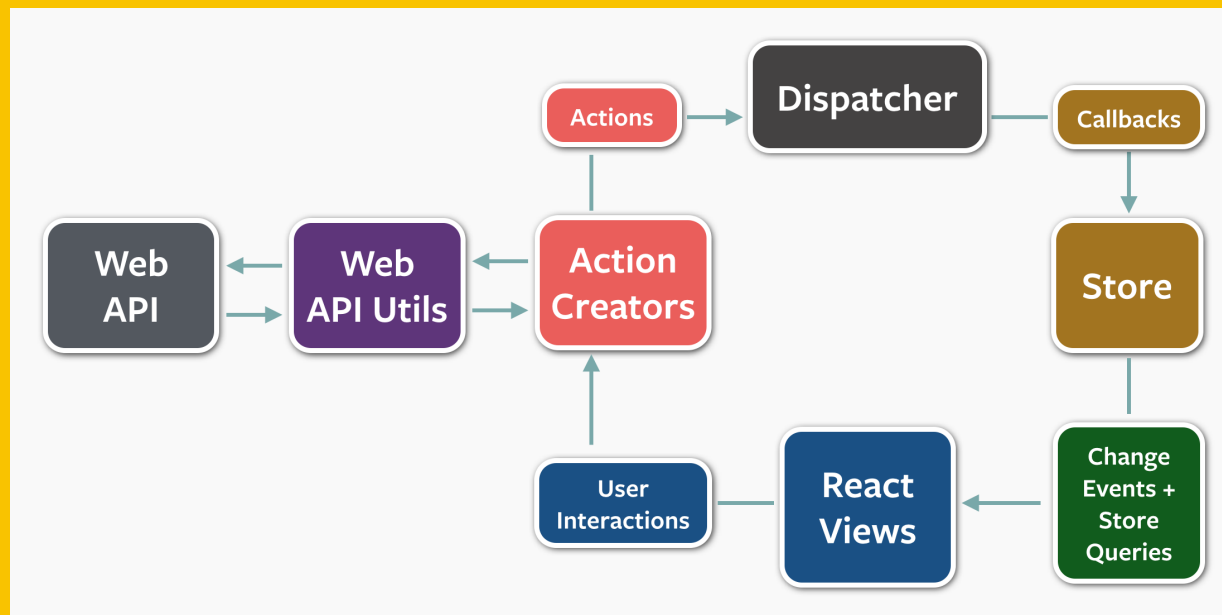

# REACT.JS

**Used at Facebook, uber,  
instagram, google, inuit,  
optimizely, netflix,  
booking.com, etc.**

# It is a highly performant view layer

- virtual dom diffing, the DOM sucks
- composable components
- you could call it the V in MVC

# Flux

# Application state management is hard

- - *Henrik Joreteg*

| **the DOM sucks**

-- *addy osmani, google*

- react.js, flux, redux
- hot module reloading
- es6 (ecmascript 6), babel transpiler
- webpack (loaders/transforms, dev server, watch)
- optimizely
- node.js / express
- sass, gpu accelerated transitions
- d3 charts, joyride
- single state tree

# JAVASCRIPT EVERYTHING

**The button has been clicked 0 times**

**CLICK ME**

# THE FUTURE

- scaffolding for january
- micro-app ready
- build in amazing analytics, a/b testing
- react native
- NM as cool as facebook
- awesome customer experience(s)
